

The Plug-and-Play Sound System for Rail Lighting Systems

Nowadays, a good sound is the flagship for many bistros, cafés or restaurants. More than ever before, trade and retail have to convince with individual shop concepts. Choosing the right speaker system is crucial because an elaborated PA application is an indispensable tool for managing customer satisfaction and business success.

reddot winner 2021

The innovative audio solutions of Spottune create a pleasant shopping and working environment which makes customers, guests and employees feel comfortable. Instead of being optimised for a frontal listening position as it is the case with standard speakers, the Spottune OMNI REC speaker is acoustically designed to provide a homogeneous radiation. Thanks to this 360° sound field, the room requires less speakers for an effective sound reproduction. The 360° sound radiation creates a consistent listening experience throughout the room, regardless of the position in the room: at the PoS, in the restaurant, hotel or at other commercial PA applications.

Plug-and-Play: Connect and Off You Go!

In shops, supermarkets, restaurants and other environments which feature existing contact rails for lighting systems, Spottune OMNI TRACK speakers can be installed in no time. The slim and elegant design can perfectly be integrated into the existing rail lighting concept.

OMNI-TRACK/SW

Order No. 1000604

OMNI-TRACK/WS

Order No. 1000605

Spottune OMNI TRACK speaker

- All-in-one smart speaker (built-in amplifier, audio filter and receiver)
- Easy plug-and-play installation to existing 3-phase rail lighting systems
- Automatic linking and settings in pairing mode with LED status indication at initial operation via Spottune network audio streamer STREAM
- Consistent 360° sound radiation for a constantly pleasant sound experience, independent of the position in the room
- Well-balanced and clear sound at low volume
- Reliable and stable audio transmission in the frequency range of 1.9 GHz
- Closed full range speaker system

Supplied w/o lighting rails.

Supplied with global track adapter GA 69 for installation to a 3-phase high-voltage rail.

Stream It! Wireless Audio Transmission

The Spottune OMNI speakers are controlled and managed via radio link, using the Spottune network audio streamer STREAM. The cloud-based transmitter unit combines DSP functions and versatile audio sources. For announcements, the base station STREAM features an integrated microphone and a connection for an external microphone. Flexible multi-room PA applications with different audio sources can easily be realised, too.

STREAM

Order No. 1000606

Spottune STREAM audio streamer

- Central transmitter and receiver unit (high operating reliability due to DECT technology)
- 2 music zones can be controlled individually
- Microphone input for announcements
- Web-based DSP and control surface
- Spotify Connect
- USB port for music reproduction
- Different music contents can be played in separate zones
- Status monitoring of integrated speakers
- Announcements via microphones to all speakers

Unique Sound – Perfect Comfort – Best Listening Experience

The Wireless 360° Speaker System from Spottune

Quick and Easy First Start-up

Assembly and installation are done in just a few quick steps. The Spottune OMNI speakers are suitable for both new installations and for subsequent addition.

Music Streaming in the UHF Band

The Spottune speaker systems use fail-proof audio transmission in the UHF frequency range of 1.8–1.9 GHz. This ensures a significantly higher stability with wireless transmissions than the heavily loaded 2.4 GHz WiFi network.

360° Sound Radiation

The omnidirectional speakers provide an impressive 360° sound, a homogeneous radiation in all directions and a perfect listening experience.

Spottune Cloud

The central cloud-based connection allows for an individual control of each Spottune speaker. It only takes a few minutes to link the speakers to the Cloud platform. Are you interested in the Spottune Cloud? Just contact us.

All-in-One Smart Speakers to Tackle Any Challenge

For applications without contact rail systems, the wireless speaker is available either as a pendant speaker for installation to standard ceiling sockets (OMNI-CORD) or as a ceiling mount speaker for installation into suspended ceilings (OMNI-REC) with standard high-voltage plug-in connection.

Powerful Addition in the Bass Range

The Spottune SUB subwoofer is used in combination with the Spottune OMNI speakers as an addition to the Spottune speaker system. The subwoofer can be mounted either on the floor, on the wall or on the ceiling, depending on the requirements and spatial conditions. No cables are required for the connection to the central audio streamer Spottune STREAM, simply use plug-and-play.

SUB/SW
