- A** No supplementary charging required (Carry out supplementary charging before use if 100% capacity is required).
- B** Supplementary charging required before use. Optimal charging way as below:  
1. Charged for above 3 days at limited current 0.25CA and constant voltage 2.25V/cell.  
2. Charged for above 20 hours at limited current 0.25CA and constant voltage 2.45V/cell.  
3. Charged for 8 ~ 10 hours at limited current 0.05 CA.
- C** Supplementary charging may often fail to recover the capacity. The battery should never be left standing till this is reached.
