

Telecamera Wifi a batteria 3Mpx Hom-Batt-PTZ

Sicurezza in ogni condizione

be smart, be wireless

Manuale d'uso

Cod. 559593069

Schema di descrizione dell'interfaccia

Contenuto della confezione

- Telecamera x1
- Manuale x1
- Accessori per il montaggio x1

Specifiche principali

- Modello: HOM-BATT-PTZ
- Risoluzione: 3,0 Mpx (2304*1296)
- Batteria: 3x18650, 5400mAh (ricaricabile con pannello solare opzionale, codice: 559593072)
- Durata della batteria: 2 mesi per 30 allarmi giornalieri
- Tempo di ricarica completa USB: 8H con alimentatore 10H con pannello solare da 3,5W
- Archivio locale: Scheda MicroSD 64 GB max
- Angolo di rotazione: PAN 320° - Tilt 90°
- Alimentazione: USB-C DC 5V 2A
- WiFi standard: 2,4 Ghz 802.11 b / g / n
- Piattaforme supportate: Android / iOS

Istruzioni per l'uso

- 1. Bottone:** *Sul retro dell'obiettivo della fotocamera Bottone ON/OFF : [OFF/ON] Reset: durante il riavvio, premere a lungo per 5 secondi per resettare.
- 2. Indicatori luminosi:** La spia rossa continua a lampeggiare: attendere la connessione alla rete. La luce rossa è sempre accesa: stato di errore, riavviare. La luce rossa continua a lampeggiare: La connessione di rete è in corso. Le luci blu sono sempre accese: Il dispositivo è collegato correttamente.

Preparazione all'uso

- Dopo aver ricevuto il prodotto, accendere il dispositivo. Per il primo utilizzo, utilizzare un caricatore DC 5V2A per la carica completa. In alternativa è possibile utilizzare il pannello solare Hom-io (cod. 559593072, acquistabile separatamente).
- Scaricate l'applicazione HOM-IO dall'App Store o da Google Play.

Scopri l'intera gamma su: www.hom-io.it

Scarica l'app "Amazon Alexa" o "Google Assistant" per collegare i dispositivi. Selezionando un dispositivo nel menù " " dell'App Hom-io è disponibile la guida per la connessione ai sistemi di controllo vocale.

* Per Alexa seleziona "Skill e giochi" e cerca "Hom-io" oppure "Smart Life". Per Google "tasto +", "configura dispositivo", "compatibile con Google" e cerca "Hom-io" oppure "Smart Life". Collegati con le credenziali dell'APP Hom-io.

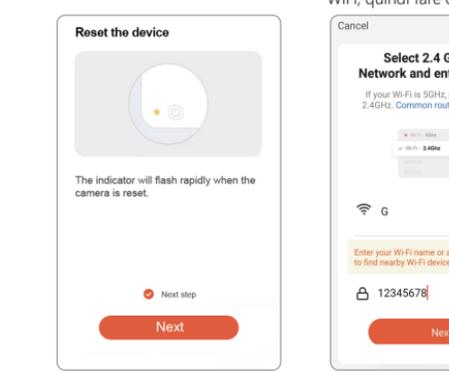

Connessione del dispositivo

- Se è necessario registrare, installare la scheda TF (il chip della scheda TF è rivolto verso il pulsante "Reset").
- Accendere il dispositivo e attendere il segnale acustico e il lampeggiamento della luce rossa.
- Aprire la pagina iniziale dell'APP per connettersi al dispositivo, come segue:

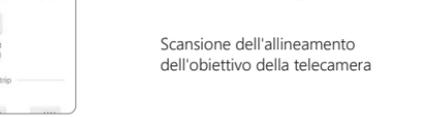

3. Cliccare "Avanti"

Istruzioni per l'uso dell'apparecchio

- Cliccare "Aggiungi dispositivo", "Sicurezza", "BATT-PTZ"
- Immettere l'account e la password WiFi, quindi fare clic su "Avanti".

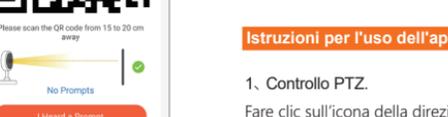

3. Cliccare "Avanti"

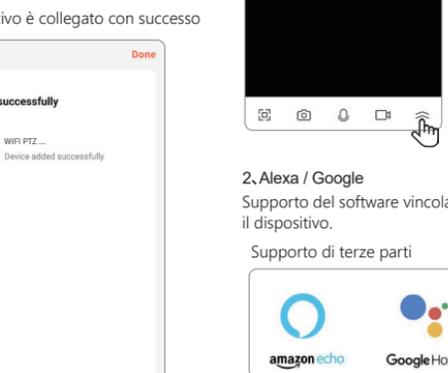

Controlli PTZ

- Fare clic sull'icona della direzione per controllare la rotazione verticale e orizzontale della telecamera.

3. Cliccare "Avanti"

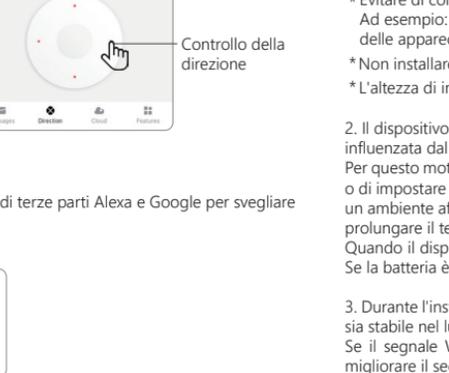

Promemoria sulla funzione di rilevamento degli umanoidi PIR

- * La sensibilità del rilevamento della sagoma umana può essere impostata nelle impostazioni del dispositivo. Se si utilizza il dispositivo in un ambiente affollato, si consiglia di disattivare il PIR e il rilevamento della sagoma umana o di impostare il dispositivo su una sensibilità bassa per evitare allarmi inutili e prolungare la durata della batteria.

3. Cliccare "Avanti"

3. Messaggi di allarme

- Fare clic su "Messaggio" per visualizzare il messaggio di allarme del dispositivo.

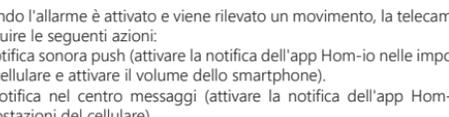

3. Cliccare "Avanti"

4. Visualizzazione della riproduzione video

- Fare clic su "Funzioni-Riproduzione" e selezionare la data per visualizzare tutti i file e i video del giorno.

3. Cliccare "Avanti"

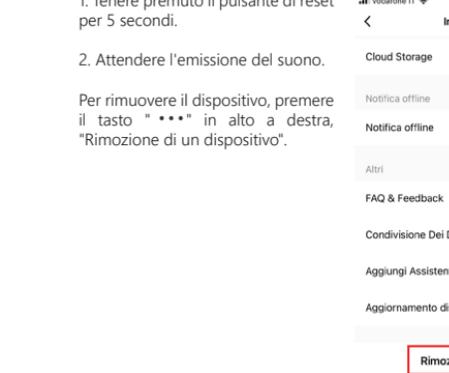

5. Configurazione dell'account

- Fare clic su "Profilo", "Gestione casa", aggiungere l'account con cui si desidera condividere i dispositivi e regolare le relative autorizzazioni. È anche possibile condividere il singolo dispositivo dal menù di ogni oggetto.

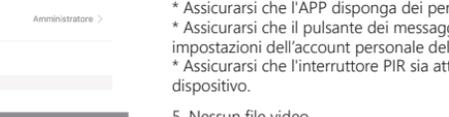

3. Cliccare "Avanti"

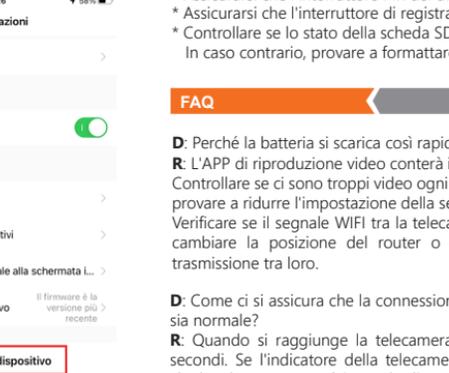

6. Impostazioni avanzate

- Quando l'allarme è attivato e viene rilevato un movimento, la telecamera può eseguire le seguenti azioni:

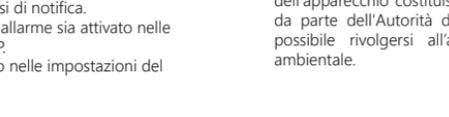

3. Cliccare "Avanti"

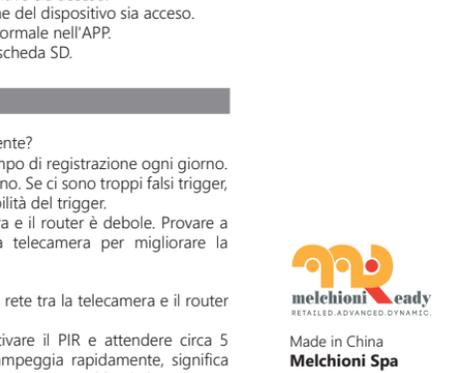

7. Impostazioni di rete

- Tenere premuto il pulsante di reset per 5 secondi.
- Attendere l'emissione del suono.

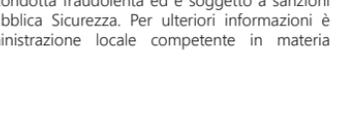

3. Cliccare "Avanti"

8. Rimozione del dispositivo

- Per rimuovere il dispositivo, premere il tasto " " in alto a destra, "Rimozione di un dispositivo".

3. Cliccare "Avanti"

Packing list

- Camera×1
- Manual×1
- Accessory package×1

Main Specifications

- Product name: HOM-BATT-PTZ
- Resolution: 3.0 Mpx (2304*1296)
- Battery: 3x18650, 5400mAh (rechargeable with solar panel-optional, code: 559593072)
- Battery life: 2 months for 30 daily alarm triggers
- USB full charging time: 8H with power supply 10H with 3,5W solar panel
- Local archive: MicroSD card 64 GB max
- Rotation angle: pan 320° - tilt 90°
- Power supply: USB-C DC 5V 2A
- Standard WiFi: 2.4 Ghz 802.11 b / g / n
- Supported platforms: Android / iOS

Operating instructions

- Button:** *On the back of the camera lens ON/OFF button : Reset button : In the boot state, long press for 5 seconds to reset.
- Indicator light:** The red light keeps flashing : Wait to connect to the network. The red lights always on : In error state, please restart. The red light keeps flashing : The network connection is in progress. The blue lights always on : The device is successfully connected.

Preparation for use

- After getting this product, please turn on the device first; for first time use, please use a DC 5V2A charger to fully charge the device; to avoid charging via power supply, the Hom-io solar panel is available and can be purchased separately, code 559593072
- Download the HOM-IO app from the App Store or Google Play

Discover the full range on: www.hom-io.it

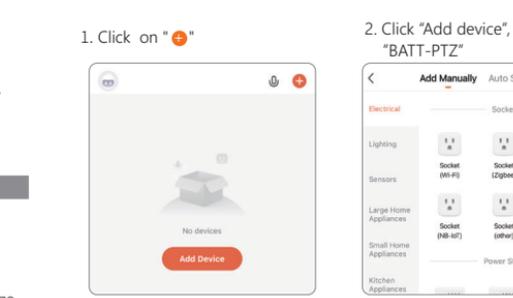

Download the app "Amazon Alexa" or "Google Assistant" to connect the devices. By selecting a device in the " + " menu, the guide is available for connecting to voice control systems.

* For Alexa select "Skill and play" and search for "Hom-io" or "Smart Life". For Google "+ button", "configure device", "compatible with Google" and search for "Hom-io" or "Smart Life". Connect with the credentials of the Hom-io APP.

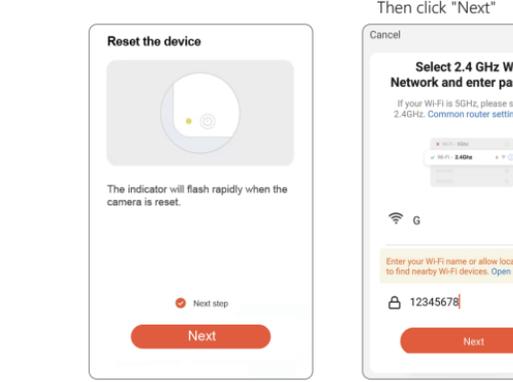

Device connection

- If recording is needed, please insert the TF card (the chip of TF card is facing the " Reset " button)
- Power on and wait for the beep and the red light flashing.
- Please open the APP homepage to connect to the device; as follows:

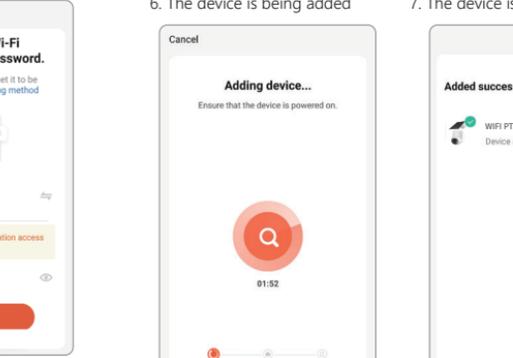

- Click on " + "

Equipment instructions

- Click "Add device", "Security", "BATT-PTZ"
- Enter WiFi account & password, Then click "Next"

A few reminders about the PIR humanoid detection feature

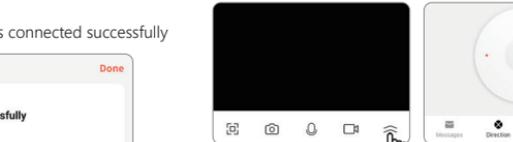

* The human silhouette detection sensitivity can be set in the device settings. If used in a crowded environment, it is recommended to turn off the PIR and human silhouette detection or set the device to low sensitivity to avoid unnecessary alarms and to prolong battery life.

- OFF : In this state, the device will not perform detection.
- Low : When the device is in hibernation state, it can detect movement at a distance of 6 meters to signal the intrusion.
- Middle : When the device is in hibernation, it can detect movement at a distance of 9 meters to signal the intrusion.
- High : When the device is in hibernation state, it can detect movement at a distance of 12 meters to signal the intrusion.

Equipment instructions

- PTZ Control.

Click the direction to control the vertical and horizontal rotation of the camera.

- Alexa / Google

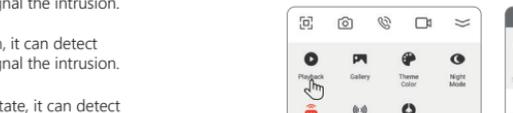

Support binding third-party software Alexa and Google to wake up the device.

Third Party Supported

3. Alarm message

Click on "Message" Notification to view the device's alarm message.

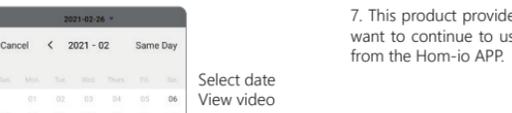

Matters needing attention

- PIR is sensitive to cold and hot disturbance, points should be noted during installation:
 - * Avoid placing the device in places where the air is churning. For example: air conditioning outlet, equipment cooling outlet, fan surrounding, curtain nearby, etc.
 - * Do not install the device directly in front of the glass or mirror.
 - * The recommended installation height of the device is about 2.5m-3m.
- The device supports battery power, and the battery's service time is affected by the wake-up time and frequency of the device. So the human detection function is suggested to turn off or set the device to low sensitivity when used in a crowded environment, so as to reduce the wake-up times of the device and extend the application time. When the device is low in power, please charge it in time. If the battery is underpowered for a long time, it may cause battery failure.
- During the installation of the device, please ensure that the WIFI network signal is stable at the installation location, especially outdoors. Please check whether the WIFI is covered. If the WIFI signal is weak, a WIFI router should be added to improve the signal.

4. View video playback

Click "Features-Playback" then select the date to view all the files and videos of the day.

4. The device is a low-power intelligent product, which can support APP remote wake up, PIR human detection wake up, button wake up.

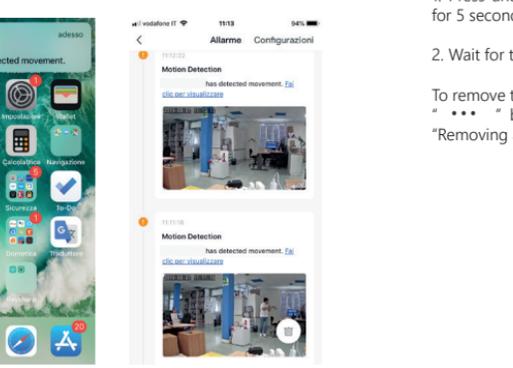

Each time the wake-up device works, it will automatically enter the sleep state after a short time.

- To ensure that the device can work normally, please first charge with USB cable for 10 hours. Do not use a power bank supply to charge, otherwise it is very likely to cause a short circuit.
- The device supports 2.4GHz WiFi but does not support 5GHz WiFi.
- This product provides optional cloud storage. After the trial period, if you want to continue to use the cloud storage service, you need to purchase it from the Hom-io APP.

Push and playback notifications

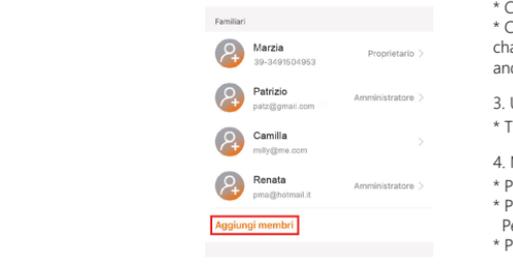

When the alarm is enabled and a movement is detected the camera can perform the following actions:

- Push sound notification (enable notification of the Hom-io app in the mobile settings and also activate the smartphone volume)
- Notification in the message center (enable notification of the Hom-io app in the mobile settings)
- Snapshot of the alarm video and video recording on SD card (insert the SD card) / Cloud

Device sharing

Click on "Profile", "Home Management", add the account with which you want to share the devices and adjust their permissions. It is also possible to share the single device from the menu ... of each object.

Reset and remove device

- Press and hold the Reset button for 5 seconds.
 - Wait for the sound to come out.
- To remove the device, press the " ••• " button at the top right, "Removing a device".

Troubleshooting

- Failed to configure the network
 - * Check whether the device is configured.
 - * Please ensure that the phone, camera and router are close enough.
 - * Note that the device does not support 5GHz WiFi routers.
 - * Check whether the router name and password are correct.
- Offline equipment
 - * Check whether the router's Internet can be connected properly.
 - * Check whether the router is connected to the camera. If the router is changed or the WIFI password is modified, please try to reset the device and reconfigure the network.
- Unable to preview
 - * The server may be congested, please try to restart the APP.
- No message push
 - * Please ensure that the APP has notification permission.
 - * Please ensure that the alarm message push switch is turned on in the APP Personal Center Settings.
 - * Please ensure that the PIR switch is turned on in the device settings.
- No video files
 - * Please insert the SD card before starting up.
 - * Please make sure the device PIR switch is on.
 - * Please make sure the device recording switch is on.
 - * Please check whether the SD card status is normal in the APP. If not, please try to format the SD card.

Common Problems

Q: Why does the battery drain so quickly?
A: APP playback video query will count the recording time every day. Please check whether there are too many videos every day. If there are too many false triggers, please try to lower the sensitivity setting of trigger. Check whether the WIFI signal between the camera and the router is weak. Try changing the position of the router or camera to improve transmission between them.

Q: How do you ensure that the network connection between the camera and the router is normal?
A: When you reach the camera, trigger the PIR and wait for about 5 seconds. If the camera indicator blinks quickly, it indicates that the camera cannot connect to the router smoothly.

Product compliance

SIMPLIFIED EU DECLARATION OF CONFORMITY
Hereby, manufacturer Melchioni Spa declares that the radio equipment type 3Mpx WiFi battery camera, Mod. HOM-BATT-PTZ (code 559593069) is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: <http://www.melchioni.com>

According to Directive 2012/19/EU of the European Parliament and of the Council, of 4 July 2012, on waste electrical and electronic equipment (WEEE), the presence of the crossed-out bin symbol indicates that this appliance is not to be considered as urban waste: its disposal must therefore be carried out by separate collection. Disposal in a non-separate manner may constitute a potential harm to the environment and health. This product can be returned to the distributor when purchasing a new device. Improper disposal of the appliance constitutes misconduct and is subject to sanctions by the Public Security Authority. For further information, contact the local administration responsible for environmental matters.
